

## **ADISCAN 1m wider walk through metal detector**

--In some security inspection location, big body person, women carrying baby or fat person bring some troubles for security guys .

Because normal walk through metal detector inspection size just 70cm width.  
It is a little small for big body person .

To solve this problem, our supplier have developed a customized bigger inspection size walk through metal detector for the client .

The inspection width size can up to 1m or more (see the attached case image)

**1m width inspection size**

**normal 70cm width inspection size**
