Bulletproof plate

The bulletproof plate of Perfect-protection Technology is a kind of composite of fiber and ceramic, the strike face is the ceramic and the backing material is a kind of thermal forming by polymer material and thermo setting resin. Perfect-protection have bulletproof plates in different levels, with various specifications and materials according to different requirements of customers, such as single curve bulletproof chest plates, multi-curve bulletproof chest plates and bulletproof side plates.

GAS MASK

Synopsis of Wide Visual Field Filtering Gas Mask
 This product is designed of dual reflexed gasket and wide visual window, therefore, it is possessed of features of lower leakage coefficient, wider visual field, better fog-proof at low temperature, clear talking and suitable for different head, comfortable wearing, safe and better commonality. It is very convenient for using because its mask is directly connected with canister.
 The canister is filled with qualified active carbon(catalyst) and high efficiency filter paper which is full of better protective functions against various toxic smoke, toxic fog, toxic gas, germs, radioactive dust and particle gasoloid with advantages of small resistance and light weight.
 Protective scope of canister(green): hydrocyanic acid, cyanogen chloride, arsine, carbonyl chloride, diphosgene, larvacide, benzene, cellume, carrene, mustard gas, phosphine, etc.
 Suitable Conditions: Oxygen content is not less than 18%, density of toxic gas less than 2%.
