Container House Promotion

Product introduction

Container mobile house, also known as camping house, container apartment housing, is adopted container technology (also can adopt market standard steel material as main skeleton). Taking sandwich panel as wall panel, standard modulus as space assembled. The components use welded and bolts to combination. Bottom use plywood or MGO board as flooring. At the same time can use a variety of ceramic as surface decoration. Making the inside space neat and bright. It is a new concept of green economic type container house. Conveniently quick lifting and transport, to achieve universal standardization of temporary buildings. Establish environmental protection and energy saving, efficient buildings concept. Make the temporary houses into the field of developing, manufacturing, and supporting supply, can be stocked and recycling.

Advantages and features

1. Activity: removable and repeated use.
2. Quick assembly: short finish time, without foundation.
3. Safety: light steel structure, anti-typhoon, anti-earthquake
4. Durability: corrosion resistance, acid resistance, not easy to get rust. the span life can be achieved 10 years above.
5. Economical: low cost, high quality.
6. Combination: can be free combination, or stacked for 2 floors.

Application

1. Booth, canteen, mobile store, mobile toilet and bathroom.
2. Motel, hotel, restaurants and civilian residence field etc.
3. Project construction site office and residence.
4. Emergency disaster rescue temporary command center, hospitals, canteens, schools.
5. Industry temporary office, stockage room, canteen, equipment control room.
6. Field and outdoor working industry.
7. Beauty spot, garden small house, vacation room.
