

# BED LINEN

SOLUTIONS FOR HOSPITALS AND NURSING HOMES

## SHEET AND PILLOWCASE 100% COTTON ORGANIC AND COMPOSTABLE

SUITABLE FOR HOSPITAL BEDS AND NURSING HOMES

format open sheet cm 140x240

format pillowcase cm 50x70

**HYGIENIC:** Sheet and pillowcase are disposable and will be used only by the end user; without subsequent washing, ensuring hygiene, especially in the departments of infectious diseases.

**GUARANTEED COST:** You only spend for what you use, bypassing the rentals, typical of laundries, where it becomes difficult to understand the actual volume of use of the product.

**HYPOALLERGENIC:** Cotton is hypoallergenic, therefore suitable for contract with even the most sensitive skins (think about dermatology departments). It is therefore guaranteed the highest level of comfort, unlike paper or TNT fibres synthetic products, that cause irritation and allergic reactions.

**DISPOSAL:** Thanks to its nature, 100% natural cotton, it can be disposed of in compost or even be burnt. This is compliant with CE regulations, which increasingly asks for the replacement of plastic materials with compostable materials.

**SPACE:** Considerable is the saving of space, as you no longer have to manage the bags of dirty sheets, to make to the laundry.
