BOOT CARE INSTRUCTIONS

CLEANING

Dirt can be harmful to leather; cleaning will remove dirt buildup that can mark the look of the leather.

All leather should be cleaned prior to polishing. Clean your boot on a regular basis using a moist, soft brush or rag to scrub away dirt.

WEATHERPROOFING

Weatherproofing keeps leather looking good and extends its durability.

We recommend using water-based formulas to waterproof your boots; they perform better and don't over soften leather or harm fabric.

POLISHING

Polishing, the most recognized step in shoe care, is an important treatment in maintaining a new appearance for smooth leather articles.

For this purpose we recommend a polish cloth or sponge the same color of your boots.

AVOIDING HEAT

Leather, glue, and the outsole are very sensitive to heat. It is best to keep your boot away from direct heat.

It can cause sun damage to the leather and glue used on the outsole and possibly cause it to separate from the upper.
