Company Introduction

Global Market

We have experienced for 300 projects in 100 cities, 26 provinces all over China.

Mountain tourism development Solution

On designing and construction for mountain tourism field, including ropeway, mountain tourism amusement, glass viewing platforms, glass suspended bridges, mountain drifting water skiing, slidaway, skiing, forest adventure, etc. We can provide all-around systematic integration solutions for users.

Application Area

Toursim

In order that the tourists can easily make sightseeing on mountain scenic area, park and vast scenic area. We can make specialized designing and manufacturing all kinds of ropeway, such as cabin ropeway, basket ropeway, chairlift and its mixed type ropeway. By our excellent designing, while you are riding our safety and comfortable ropeway, you can make sightseeing with a feeling of joy for different exoticism, cultural heritage, fantastic landscape and overlooking panorama, and the ropeway can carry the passengers from scenic spot A to scenic spot B, making sightseeing scenic area with freedom, which can leave an unforgettable impression for you.

Winter sport

Since 20 years, more and more people begin to love the winter sports. Since then, our company is always reliable cooperative partner in lots of ski resorts from China and the Asia. We have provided excellent products and services for hundreds of ski resorts in China, Russia, Japan, Mongolia, India, Pakistan, Tajikistan, Indonesia. According to passengers' various requirements, whether or not they are children or adults, beginners or professional sportsmen, teams or individuals, we have different innovative designing. We can design and customized all kinds of ropeway according to customers' requirements, such as cabin ropeways, chairlifts, conveyor, sledges and its mixed type ropeway, etc. Your wishes and trust are our all of motivation of effort.

Urban

The innovative ropeway provide by us make the cities which own them to benefit a lot. The ropeway can cross over residential area, rivers and present infrastructure, with easily glide over every traffic barrier. Our innovative design make ropeway and city all blend into one harmonious whole. When riding comfortable ropeway, passengers can conveniently travel, at the same time, passengers can watch the urban landscape by the new visual angle. According to your different requirements, we can design and manufacture different style and different kinds ropeway. While increasing a beautiful scenery line for your city, we will work hard for creating additional values for your city and people's convenient travel.

Amusement park

In order that tourists can easily go sightseeing and overlook panorama, we can make innovative design and manufacture new type ropeway for amusement park. On the design, we can match the whole plan and style for amusement park. The ropeway has the characteristics of beautiful, safety, comfortable, economical and practical, etc. the ropeway is the ideal choice for your amusement park.

Material transport

Mountainous area, rivers, high position, or the places which need ropeway to transport have our innovative-designing ropeways. Our material ropeway occupy small spaces, Even though mountainous area, our ropeway can cross over very long distance and main barrier by setting up the towers. Besides the ropeway can provide advanced technology and excellent quality solutions for carrying persons, the ropeway manufactured by us can transport safely, with high efficiently all kinds of materials to destination. The ropeway become your ideal equipment of cargo transportation. According to different requirements and different situations of customers, we can design the ropeway with different style and different kinds. Your wishes are our continuous, innovative impetus.

Pulsatile Cabin Ropeway

The pulsatile ropeway is a passenger ropeway on which the carrier operates on a pulsating line (run fast—run slowly—run fast—run slowly). Double multiple carrier groups are hung on the carrying line by fixed grip in equidistance. It can adapt to the more complex topography and undulating topography. Its operation mode is using low speed in the station and high speed out of the station so that the passengers are easy to get on or off.
