	socket	built-in x 1pc

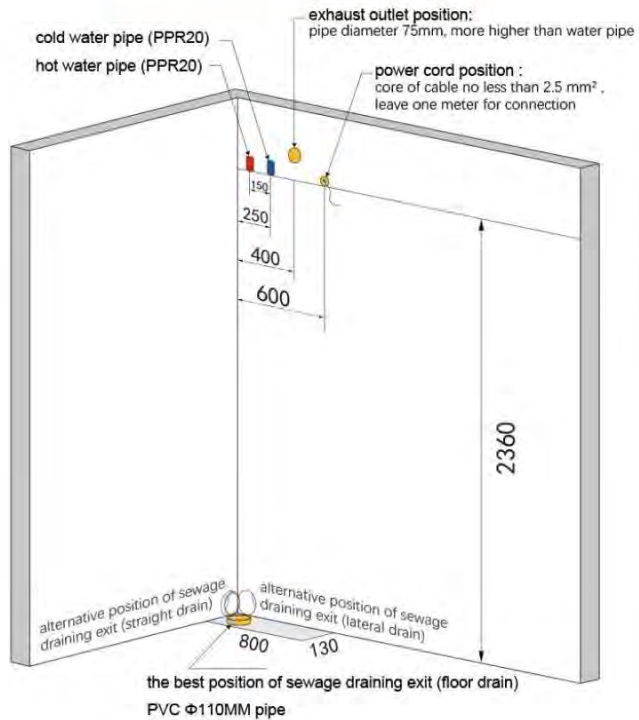

## Plan

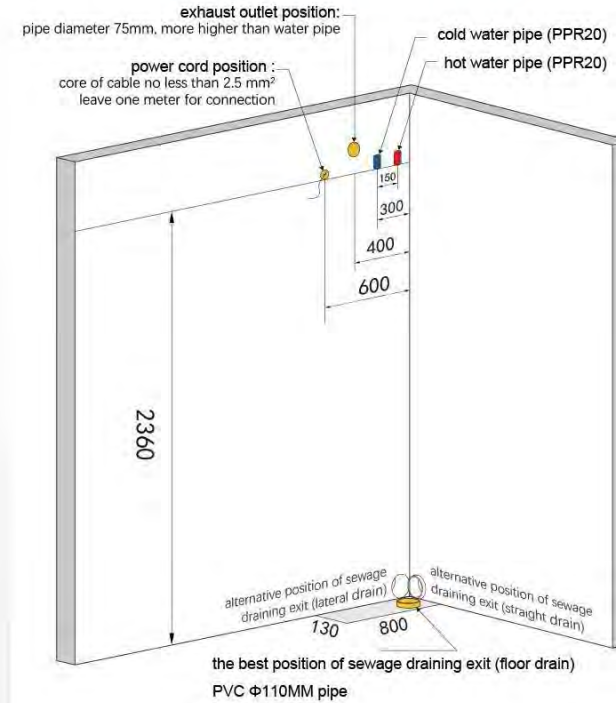

## Preparation before installation

### water and electricity layout (left-room)

### water and electricity layout (right-room)

#### 1. Three options for sewage pipe position(Dia. of pipe:110MM, with vent pipe )

Floor drain: should be in the shadow area, tee coupling close to the ground or pipe opening parallel to the ground

Straight drain: should be close to the corner and ground;

Lateral drain: should be close to the corner and ground;

#### 2. Exhaust outlet (Dia. of pipe 75MM) and water-entering pipe(PPR20 pipe) position

Ground distance should be no less than 2350MM, and exhaust pipe should be outside the wall 100MM; exhaust outlet position should be more higher than water-entering pipe

#### 3. power cord position

Ground distance should be no less than 2360MM. Please use 2.5 square power cord, one meter length left for connection.

#### 4. Keep the ground in the installation area horizontal and smooth

#### 5. All the pipes or cords should be left more longer, for easy jointing while installation.
