

A digital illustration of a dragon breathing fire. The dragon is shown in profile, facing right, with its mouth open and a stream of bright blue and white fire being emitted. The dragon's body is dark, and its wings are spread. The fire has a glowing, ethereal quality.

DRAGONFIRE

3D Realistic Safe Flame

DRAGONFIRE is a type of electric fireplace insert powered by water that uses ultrasonic technology to create a fine mist that mimics the appearance of flames and smoke. These fireplaces do not produce actual flames, but instead, they create a realistic-looking flame effect using LED lights and water vapor.

Water vapor fireplace inserts are generally easy to install and use, as they do not require any venting or chimneys, and they can be operated using a remote control. They are also considered to be a safer and more environmentally-friendly alternative to traditional fireplaces since they do not emit any harmful pollutants or particles into the air.

WATER VAPOUR FIREPLACE

WATER VAPOUR FIREPLACE

Series Magic Fire

-  Realistic Flame
-  Remote Control
-  Automatic Water Filling
-  Automatic Water Draining
-  Water level detection
-  Water shortage reminder
-  Water overload protection

Series Fire-S

-  Realistic Flame
-  Remote Control
-  Automatic Water Filling
-  Automatic Water Draining
-  Water level detection
-  Water shortage reminder
-  Water overload protection
-  Multicolor Flame

Series

Magic Fire-Plus

-  Realistic Flame
-  Remote Control
-  Automatic Water Filling
-  Automatic Water Draining
-  Water level detection
-  Water shortage reminder
-  Water overload protection
-  Multicolor Flame
-  Voice-activated Control

Series

Magic Fire-Pro

-  Realistic Flame
-  Remote Control
-  Automatic Water Filling
-  Automatic Water Draining
-  Water level detection
-  Water shortage reminder
-  Water overload protection
-  Multicolor Flame
-  Voice-activated Control
-  Musical Rhythm

Volts:	110V-220V	110V-220V	110V-220V	110V-220V
Watts:	120/200/230W	120/200/230W	120/200/230W	120/200/230W

- Ideal for creative projects, to be installed in furniture or used for otherdecorative purposes.
- Surprising by the floating flame and smoke effect and variable flame intensity.
- Newly developed with LED lights for lower power consumption with a longer service life.

WATER VAPOUR FIREPLACE

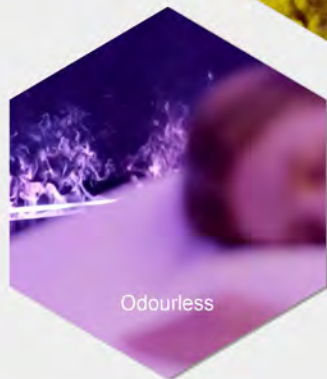

Runs on water

Zero Residue

Safe to touch

Odourless

Comfortable Atmosphere

- New Generation of Energy-saving Waterproof LED light Source.
- Energy-saving LED stable light source, waterproof puter shell, light concentration and rapid pneumatic delay.

- Smart Chip Automatically Power off after Water Shortage
- From the frequency conversion chip core technology, automatic power off after the water is used up and refuse dry burning to damage the machine.

- Waterproof mute will not produce noise and you can hear the sound like charcoal, which will make you feel comfortable when sleeping.

- The vent design is beautiful and practical.
- Take custom panel ventilation, you can achieve better ventilation effect, long service life.
